

Decomposition approach for generating Lyapunov function of complex dynamical system

Kidouche Madjid was born in Bordj-Menaiel, Algeria. He received Engineering, Master of Sciences, and Ph.D degrees all in control theory. He joined M'hamed Bougara University of Bumerdes, Algeria in 1990 where he is a full Professor in the department of automation and electrification of industrial process. He is a research group head on "Control of complex dynamical systems" at Applied Automatic Control Laboratory. He has been actively involved in several research projects in the fields of control and power system analysis. He is the author and co-author of numerous research publications in international conferences and recognized journals. His research interests include modeling and control of dynamic nonlinear systems, stability of large scale systems, fuzzy and sliding mode control.
